

MSOL MSN-70

Chrome stable pure synthetic lightfast fatliquors

CHARACTERISTICS:

Chemicals Composition: Based on Sulphochlorinated paraffin wax , aliphatic Hydrocarbons and special softness.

Aspect : Medium brown free flowing liquid.

Active Matter : 70 ± 2

pH Value (10% Solⁿ) : 7.0-8.0

Light Fastness : Excellent

Stability : Stable to mild acid, alkali, salts & hard water.

PROPERTIES & APPLICATION:

MSOL MSN-70 provides uniform distribution of fat liquor the cross section of the leather. Hence imparts good softness without making the leather loose.

MSOL MSN-70 produces leather with good fullness, softness and ensures firm and smooth grain. It imparts light waxy touch with full handle.

MSOL MSN-70 versatile fat liquor suitable for all types of leather such as Upper, Softy, Lining, Nappa, Garment, Suede, Nubuck, Gloving & Bag Leather etc.

Since it has excellent light fastness thereby suitable for production of white and pastel shade leather.

MSOL MSN-70 can be used 2-10% depending upon type of leather to produced and desired softness.

Storage Stability : 9-12 month under normal conditions.
