

MSOL PS

Specification:

Base	: Compact fatliquor ; Combination of Synthetic Esters and other Softening agent.
Appearance	: Dark Brown Coloured free flowing Liquid
Active Content	: 64-66%
PH (10% emulsion)	: 7.5-8.5
Ionic Charges	: Anionic
Light Fastness	: Excellent/ Good

Properties :

MSOL PS is a high performance compact synthetic fatliquor primarily based on Synthetic Esters.

MSOL PS is highly penetrative in nature and is specially recommended for the manufacture of leathers with high degree of softness and suppleness like gloving , Garment Nappas and Upholstery leathers.

MSOL PS imparts a very high degree of internal softness and run to the leathers without loading. It is an ideal for fatliquoring of light-weight leathers.

The light fastness characteristics of MSOL PS make it suitable for the manufacture of White and pastel shade leathers.

MSOL PS can be used either as Single Fatliquor or in Combination with other Anionic and Non – Ionic Fatliquors.

MSOL PS emulsifies readily in cold water to form a translucent emulsion, which is stable to acids and electrolytes.

Recommended dosage levels of MSOL PS:

Cow Softy Uppers	- 2- 3%
Cow / Buff Nappa	- 5- 10%
Sheep Nappa	- 6- 8%
Sheep Gloving	- 10- 12%
Upholstery Leathers	- 8- 12%

Storage:

The product should be stored away from extreme conditions. It is recommended to stir the product well before usage.

Shelf life : one year from the date of manufacture
