

**MTAN WRS / WRS-FF**  
**White tanning agent**  
**Retaining agent for chrome leather**

MTAN WRS is chiefly used as retaining agent for the production of white, lightfast leather. On leathers to be dyed, the levelness of the resultant shades and the light fastness of the tanned leather are improved.

MTAN WRS- FF is formaldehyde free version of MTAN WRS.

**Nature** : Phenol condensation product.

**Specification** : Concentration 95% approx.

pH (1:10) 3.0-3.5

**Properties** : MTAN WRS is a fine off white readily water soluble powder. This synthetic tanning agent is comparable with a synthetic and vegetable tannins and inert to salts.

: In self-tonnage MTAN WRS give white lightfast leathers with good fullness and a mild handle. Retannage of chrome leathers with this products results in pure white leathers of good light fastness are with a fine, smooth tight grain which has good buffing properties.

**Safety** : 3-8 % can be used in retanning to get good body & fullness.

3-5% after fatliquoring gives good bleaching effect.

We know of no ill effects resulting from the use of MTAN WRS for the purpose for which it is intended and in accordance with current practice.
